TASK 1: Create a GIT repository named as your enrollment number. Create 2 folder in your repository named as Assignment_1 and Assignment_2.

Step 1: Create a GitHub Repository

- I logged into GitHub.
- Clicked on "**New Repository**".
- Entered my **2302031000122** as the repository name.
- Selected the repository as Public/Private.
- Clicked on "**Create Repository"**

Step 2: Setting Up the Repository Locally

- Installed Git if not already installed.
- Opened **Git Bash / Command Prompt.**
- Ran the following command to clone my repository to my computer:
  - git clone https: https://github.com/zala2006/2302031000122.git
- Navigated to the cloned repository:
  - Cd:WT/2302031000122

Step 3: Creating Assignment Folders:

- Create Assignment folders inside the repository.
  - mkdir Assignment_1 Assignment_2
- Verify folders using following command.
  - ls

Step 4: Adding and Committing Changes:

- Staged the new folders:
  - git add .
- Committed the changes with a message:
  - git commit -m "Added Assignment_1 and Assignment_2 folders"
- Push the changes to Github:
  - git push origin main
